* 1 Watt = 0,863 Kcal/h

The heat output is certified by the Institute of engineering Politecnico in Milano according to the norm EN 442.

The expected heat output is obtained by mounting the towel warmers Vetta with specific accessories included. In order to prevent the thermal expansion of the system from causing noise in correspondence with the heaters, it is advisable to use plastic brackets to support the radiators (artt. A031, A032 in our catalogue).

EXAMPLE FOR A DIFFERENT ΔT FROM 50°C E 30°C

If you need to know a radiator heat output (P) with different ΔT use the following characteristic equation: $P = Km \cdot \Delta T^n$

Example for the Vetta 800/450 model with $\Delta T = 60^\circ\text{C} \rightarrow P = 2,77582 \cdot 60^{1,22716} = 422 \text{ Watt}$

STURDY LIGHTWEIGHT STYLISH

Vetta

CORRECT INSTALLATION, USE AND MAINTENANCE INSTRUCTIONS

- The Vetta radiators can be used in all hot water or vapour heating installations up to 110°C with a working pressure up to 1600 K Pascal - 16 bar.
- They can be installed in systems with iron, copper or thermoplastic pipes.
- In order to avoid problems due to deposit and corrosion in the systems it is recommended that the water pH is checked (preferably between 6.5 and 8) and to introduce a suitable inhibitive additive, for instance Cillit-HS 23 AI or similar in the quantity recommended by the manufacturer.
- Automatic or manual air vent valves must be installed on radiators.
- **Avoid complete closure of the radiator shut-off valves in order to allow any gas that there might be inside the same to escape through the automatic air vent valve, which is mandatory in any heating system, thus avoiding possible over-pressure that could damage the radiators.**
- **If one or more batteries are to be excluded from the circuit, an automatic air vent must be fitted to each battery.**
- To ensure lasting protection of painting, radiators must not be stored in very wet or damp environments before and after installation such as inside showers, saunas, turkish baths, near swimming pools etc.
Paint peeling off on parts of the radiator could cause the formation of aluminium oxide and have the paint completely peeled off. Do not use porous clay humidifiers.
- For the external cleaning of the radiator and surfaces near the radiator, it is necessary to avoid the use of abrasive or chemically corrosive/aggressive products of any nature, as the use of water and neutral detergent is sufficient.
Performing the operation when the radiators are cold to maintain the original brilliance of the paint over time.
- Do not place weights and/or objects on the radiators. Do not use radiators for any purpose other than heating elements (e.g.: as a support system, as steps, as support for furniture or objects).

GLOBAL provides a 10 year warranty from the production date

(stamped on the side of each sections)
The conventional warranty grants the sole right to free replacement of the radiator which, due to defects originating from defects in material or workmanship, is not fit for purpose or its ordinary intended use. Replacement radiators shall be delivered free of charge to the retailer who sold the radiator to the end customer or his installer.

The warranty is valid on the condition that the installation and the system to which the product is connected are performed by qualified/authorised personnel to top workmanship standards and in compliance with the regulations and requirements of the sector in force; it is also valid on the condition that there has been full compliance with warnings and instructions for proper installation, use and maintenance of the product indicated in the technical documentation under the paragraph entitled *correct installation, use and maintenance instructions*, available and downloadable from the *TECHNICAL INFO* section on the globalradiatori.it website. The warranty is regulated by further conditions indicated in the technical catalogue and the CONVENTIONAL WARRANTY section on the globalradiatori.it website.

ACCESSORIES

A031 white wall brackets (pair)

A032 chrome wall brackets (pair)

A242 white handy grip for Vetta

A243 chrome handy grip for Vetta

A041 1/2" adjustable manual air vent valve - white

A042 1/2" automatic air vent valve - chrome

A038 1/2" adjustable manual air vent valve - chrome

A019 plug wrench

A011 1/2" white blind plug
A011 1/2" chrome blind plug

A010 RAL 9010 white or special colours spray can

A018 Cillit HS 23 Combi liquid

A017 RAL 9010 white marker

ACCESSORIES INCLUDED

- n. 2/3 art. A031 white wall brackets or art. A032 chrome wall brackets
n. 1 art. A041 1/2" white manual air vent valve or art. A038 chrome
n. 1 art. A011 1/2" white or chrome plug

HOW TO USE CODES FOR ORDERING

VE	0800	450	10
Vetta model	overall height	pipe centres	colour code

* example **VE080045010** - **VE** Vetta; **0800** overall height; **450** pipe centres; **10** white colour

** When ordering radiators in special colours, please specify the Code according to the Colour Card (see diagram below)

cod. 10 white glossy	cod. 11 white sand	cod. 12 white matt	cod. 01 ivory glossy	cod. 05 metallic matt beige	cod. 06 metallic matt quartz	cod. 07 metallic matt dark grey	cod. 08 metallic matt silver grey	cod. 09 metallic matt rust	cod. 14 black matt
RAL 9010	RAL 9016		RAL 1013						
standard colour	special colours see the Colour Card								

The colours are indicative. For technical printing reasons, it is not possible to faithfully reproduce the paints used. The colour of the products supplied may differ from that shown in this catalogue.
